SPECIFICHE - SPECIFICATIONS :

La **pompa lavavetri** è un componente essenziale del sistema di **pulizia del parabrezza** dell'automobile. Si tratta di una piccola pompa elettrica che si trova nel serbatoio del liquido lavavetri. La sua funzione principale è quella di spruzzare il liquido detergente sul parabrezza e, in alcuni casi, sul lunotto posteriore, per rimuovere sporco, polvere, insetti o altri residui che possono compromettere la visibilità del conducente.

The windshield washer pump is an essential component of the car's windshield cleaning system. This is a small electric pump that is located in the windshield washer fluid reservoir. Its main function is to spray the cleaning liquid on the windshield and, in some cases, on the rear window, to remove dirt, dust, insects or other residues that can compromise the driver's visibility.

Quando si aziona la leva apposita nell'abitacolo, il segnale viene inviato alla pompa lavavetri che inizia a pompare il liquido attraverso dei piccoli tubi flessibili verso gli **ugelli di spruzzo** montati sul cofano dell'auto. Gli ugelli distribuiscono uniformemente il liquido sul vetro mentre i tergicristalli lo spostano via, assicurando una pulizia efficace.

When you operate the appropriate lever in the passenger compartment, the signal is sent to the windshield washer pump which begins to pump the liquid through small flexible hoses towards the spray nozzles mounted on the hood of the car. The nozzles distribute the liquid evenly on the glass while the wipers move it away, ensuring effective cleaning.

La pompa è alimentata elettricamente e controllata da un interruttore all'interno dell'abitacolo dell'auto. In caso di guasto o di ostruzione nei tubi, il flusso del liquido lavavetri potrebbe essere compromesso, riducendo l'efficacia del sistema di pulizia del parabrezza. In tal caso, potrebbe essere necessario sostituire la pompa o eseguire delle riparazioni per ripristinare il corretto funzionamento del sistema.

The pump is electrically powered and controlled by a switch inside the car interior. In the event of a fault or blockage in the hoses, the flow of windscreen washer fluid could be compromised, reducing the effectiveness of the windscreen cleaning system. In this case, it may be necessary to replace the pump or perform repairs to restore the system to proper functioning .
